

To FCC:

Dear Sir Or Madam, I urge you to reject the NAB's petition 04-160 in trying to controll what XM Radio play's on the satalite radio. My wife and I have been listing to XM every since it came out, we love the programing and the wide choice of music, and now we enjoy the weather and traffic reports. We are both retired and travel alot and we enjoy our XM to the max.

We feel that if we are paying for this service, than we have the right to enjoy it without all the adds and commercial's. I Respectfully ask you to consider if you want to take away the XM's ability to provide the kind of programming that we demand and deserve.

Vernon & Judy Hopkins
